EXTERIOR WALL CLADDINGS OF PART 9 BUILDINGS

1. Stucco Claddings – Division B, Section 9.28.

The exterior stucco will meet the requirements and intent of Section 9.28 of Division B, British Columbia Building Code 2006 and the standards referenced herein as a guide of best practice:

- CAN/CSA-A3002 “Cementitious Materials for Use in Concrete”
- ASTM C926 “Standard Specification of Application of Portland Cement-Based Plaster”
- ASTM C1063 “Standard Specifications for Installation of Lathing and Furring to Receive Interior and Exterior Portland Cement-Based Plaster”.

2. Other Claddings – Division B, Section 9.27.

Other cladding listed in Division B, Section 9.27. will meet the requirements and intent of Section 9.27 of the British Columbia Building Code 2006 and the standards referenced in the Code.

3. Field Review

I hereby undertake to be responsible for field review during construction for the following:

- Moisture management control, including protection from precipitation and interior/ exterior moisture ingress control, especially at openings and penetrations.
- Cladding movement control and thermal expansion.
- Selection and installation of materials including the sheathing, sheathing membrane, flashings, and
 - Stucco installation including (but not limited to): reinforcing lath, stucco batching and mixing, stucco application, and curing, OR
 - Other cladding installation including (but not limited to) all the requirements of Division B, Sections 9.27. and 9.20. and any standards referenced by the 2006 British Columbia Building Code.

**EXTERIOR WALL CLADDINGS
OF PART 9 BUILDINGS**

I hereby give assurance that the materials, installation and application of the exterior claddings described in the documents prepared and submitted in support of this application for building permit will meet the requirements and intent of Part 9 of the 2006 British Columbia Building Code. **I have an understanding or have employed someone who has an understanding of moisture control methods.**
